

Minor in Translation Studies

This new state-supported program was recommended by the Academic Senate on 2/22/19 and concurred by the President on 2/25/19.

Program Description

The Minor in Translation Studies provides students with insight into this multifaceted world and its many applications as a means of global exchange of ideas, knowledge, material goods, services, and technologies, across languages and cultures. It offers a foundational and scalable skill set which, combined with any other disciplinary objective, will maximize opportunities for employment and professionalization. Its three core courses impart the basic tenets of translation theory in tandem with tangible applications over the entire range of academic disciplines. Two elective courses, one in language and the other L Q W K H V W X G H Q W ¶ V S U L P D U \ D U H D establish direct links between the minor, language(s) and disciplines specific to each student.
